RESEARCH INTERESTS

I engineer soft structures whose motion is encoded in their micro-architecture. By designing fiber-reinforced dielectric elastomers, I program how they bend, twist or contract, and I integrate them as a distributed musculature into the devices they move. My flagship application is mechanically active implants, designed to restore facial movement and, next, vocal-fold mobility; bioinspired morphing wings and swimming robots are testbeds where the same principles can be tested faster. Looking ahead, I aim to make micro-architected musculature that can be manufactured reliably at small scale and operated at low voltage.

EDUCATION

Ph.D., Robotics, Control and Intelligent Systems
École Polytechnique Fédérale de Lausanne (EPFL), Switzerland
Thesis: Reinforced dielectric elastomer actuators for the restoration of facial movement
Advisors: Prof. Yves Perriard, Dr. Thomas Martinez. Completed March 2025. 2021–2025

M.Sc., Robotics
École Polytechnique Fédérale de Lausanne (EPFL), Switzerland
Thesis grade: 6.0/6.0, conducted within C-MedTec, EPFL Innovation Park
Semester project: Dictionary learning for cryo-electron microscopy, Biomedical Imaging Group (Prof. Michael Unser, Dr. Laurène Donati), 2019 2018–2020

B.Sc., Microengineering
École Polytechnique Fédérale de Lausanne (EPFL), Switzerland 2015–2018

ACADEMIC APPOINTMENTS

Postdoctoral Research Fellow, Massachusetts Institute of Technology
Aerial and Underwater Robotics Laboratory (Prof. Raphaël Zufferey) and
Soft and Micro Robotics Laboratory (Prof. Yufeng Chen)
Joint appointment combining aeroelastic flight dynamics with soft micro-actuation; independently funded by the Swiss National Science Foundation. 2025–present

Doctoral Researcher, EPFL
Center for Artificial Muscles and
Integrated Actuators Laboratory 2021–2025

GRANTS AND FELLOWSHIPS

Swiss National Science Foundation, Postdoc.Mobility Fellowship
Fibre reinforced soft and active membranes for deformable flapping wings, CHF 136,000 2025–present

Swiss National Science Foundation, Postdoc.Mobility return phase (submitted; decision December 2026)
Musculoskeletal actuators for soft flapping wing robots; host: Prof. R. Katzschmann, ETH Zurich 2027–2028

Sophie Afenduli Foundation Fellowship
Soft actuators for facial reanimation, CHF 5,000 2021

Venture Kick and X-Grant — start-up funding awards
Diagnostic tool for concussion (C-MedTec); Venture Kick CHF 10,000 2019

HONORS AND AWARDS

Rising Star talk, Northeast Robotics Colloquium (NERC 2026), Princeton University 2026

Rising Star in Mechanical Engineering, nominated and selected for the Academic Career Workshop, Stanford University 2026

Best Poster Award, Hellenic-American Meeting of Early-Career Researchers (HAMER) 2026

Best Demonstrator Award (team), SPIE EAPAD, Vancouver — soft robotic fish led by M. Koenigsdorff 2026

Best Demonstrator Award (2nd place), IEEE RoboSoft Workshop on Soft Robotic Actuation and Sensing based on Functional Materials 2025

Journal Cover, *Advanced Materials Technologies* 2025

Best Paper Award, IEEE International Conference on Electrical Machines and Systems (ICEMS) 2023

Finalist, Start Lausanne startup competition 2020

iGEM Grand Prize, 353 international teams; additionally Best Presentation, Best Wiki, and Best Human Practices awards 2019

PATENT

1. **S. Konstantinidi**, et al. "Electromechanical device for actuating a patient's eyelid." International Patent Application WO2026028097.

PUBLICATIONS

12 peer-reviewed journal articles (7 as first or co-first author), 1 preprint, 2 in preparation, 7 peer-reviewed conference papers, 1 patent application, 23 conference presentations and posters. † *denotes equal contribution.*

RESEARCH COLLABORATIONS

Eight cross-institutional collaborations, initiated and coordinated by me unless noted otherwise.

Therapeutic Technology Design and Development Lab at MIT — Prof. E. Roche. Dielectric elastomer actuators for implantable and assistive medical devices. 2026–ongoing

KAIST — Prof. Jin Woo Lee. Soft actuator-based laryngeal implant for the restoration of vocal-fold mobility, co-initiated. 2026–ongoing

Technische Universität Dresden, Institute of Solid-State Electronics — Prof. G. Gerlach. Joint investigation of instabilities in fiber-reinforced dielectric elastomer actuators; produced four co-authored publications and an invited talk. Continuing with Dr. M. Koenigsdorff (now EPFL): invited review for *Smart Materials and Structures*. 2023–present

University Hospital Zurich (USZ), Department of Plastic Surgery — Prof. N. Lindenblatt. Clinical partnership covering prosthesis design, surgical constraints, and the design and execution of in vivo animal trials. 2021–2025

ETH Zurich, Computational Robotics Lab — J. Montes. Exploratory collaboration combining soft actuation with topology optimization to design structured reinforcement architectures. 2024

EPFL Microsystems Laboratory (LMIS1) — Advanced additive manufacturing for fiber reinforcement of soft membranes: inkjet printing and melt electrowriting. 2023

Swiss Center for Electronics and Microtechnology (CSEM), Neuchâtel — Exchange of additive manufacturing methods and ink materials. 2023

Biomedical Optics Research Laboratory, University Hospital Zurich — Prof. M. Wolf, and **Advanced Quantum Architecture Laboratory, EPFL** — Prof. E. Charbon. Cross-institutional collaboration bridging clinical near-infrared spectroscopy and photonic detector engineering for a non-invasive concussion diagnostic; supported finite element modeling of mechanical impact and the associated biological cascade, and validation against an anatomically precise head phantom (C-MedTec). 2019–2020

RESEARCH MENTORING AND SUPERVISION

Supervised **20 research projects** by 20 students across EPFL, USZ and MIT. * indicates a project that resulted in a peer-reviewed publication with the student as a co-author.

Master's Theses

Enrico Bregni	MIT	2026	Design of a pterosaur-inspired flapping wing
Pierre-Jean Martin*	EPFL	2024	Design of an eye prosthesis
Carlotta Imholz*	USZ	2022	Real-time actuation of DEAs

Research Interns

Raki Ben Mustapha*	EPFL	2024	Closed loop control of DEAs
Baptiste Tankwa*	EPFL	2023	Post-paralysis upper facial movement restoration

Semester Projects

Cali Hendricks	MIT	ongoing	Onboard high voltage supply for aerial robots
Mariia Maliar	MIT	ongoing	Bat-inspired flapping mechanism
Jad Benabdelkader	EPFL	2025	Machine learning modeling and control of DEAs
Myriam Charfeddine	EPFL	2024	Design of a bistable element
Leen Bou Khaled	EPFL	2024	Structured auxetic fiber-reinforced actuators
Andy Bittan-Mosseri	EPFL	2024	Dielectric elastomer actuators for facial reanimation
Pierre Lorthiois	EPFL	2024	Inkjet printing of fiber-reinforced actuators
Lucas Romano	EPFL	2024	Inkjet printing of fiber-reinforced actuators
Mischa Oleh Mez	EPFL	2024	Design of a humanoid facial robot
Chiara Evangelisti	EPFL	2024	Design and modeling of a tissue surrogate
Arnaud Sansonnens	EPFL	2023	Modeling of fiber-reinforced DEAs
Lucas Muespach	EPFL	2023	Design and development of a humanoid facial robot
Sarah Soussou	EPFL	2023	Inkjet-printed dielectric elastomer actuators
Julian Asboth*	EPFL	2023	Uniaxial fiber-reinforced DEA fabrication
May Salama	EPFL	2022	Characterization of DEAs' self-discharge

TEACHING

Guest Lecturer, MIT — lecture on soft robotics in the course of Prof. Jean-Jacques Slotine — Spring 2026

Teaching Assistant, EPFL — *Programming (C/C++)*, *Electronics*, *Actuators and Electromagnetic Systems*. Led exercise sessions and laboratory instruction; designed and graded assessments. — 2021–2025

EPFL Tutoring Attestation — formal certification in university-level teaching — 2023

Prepared to teach: electromechanical actuators and mechatronics; soft robotics; smart materials and electroactive polymers; bioinspired robotics; medical device design; experimental methods and design of experiments; introductory programming (C/C++) and electronics.

PROFESSIONAL SERVICE AND LEADERSHIP

Co-Treasurer, MIT Postdoctoral Association — co-manage an annual budget exceeding $35,000; with the executive committee, secured a 25% budget increase from the MIT Office of the Vice President — 2026–present

Session Chair, Materials Research Society (MRS) Fall Meeting, Boston — Symposium SF05, *From Robotic Toward Autonomous Materials*; Symposium EN02, *Next-Generation Technologies for Clean Energy and Materials Sustainability* — 2025

Reporter, Materials Research Society (MRS) Fall Meeting — selected to cover symposium sessions and report on emerging research for the society's meeting coverage — 2025–present

Outreach and Dissemination Committee, EuroEAP Society (European Scientific Network for Soft Transducers and Electromechanically Active Polymers) — 2024–present

Journal Reviewer — *Science Advances*; *Advanced Materials*; *IEEE Robotics and Automation Letters*; *Smart Materials and Structures*; *Materials Research Express* — 2023–present

Operational Firefighter, SDIS Etraz, Switzerland — trained in hydraulics and radio communications — 2021–2025

Event Manager, Treasurer, and Partnership Manager, Erasmus Student Network, EPFL — administered an annual budget exceeding CHF 120,000; organized weekly programming for up to 200 students — 2016–2020

OUTREACH AND MEDIA

Swissnex Boston, invited panelist with Prof. B. Nelson (ETH Zurich) and Prof. G. Zardini (MIT), *Inside Out: How Robotics is Reinventing Medicine* — 2026

MIT Future Fest (MIT Museum) — live demonstrations of our flapping-wing aerial–aquatic robot at the opening night and, with my laboratory, on a public day — 2026

MExpo, MIT Mechanical Engineering Exposition — exhibited bioinspired and soft robotic systems to the MIT community and visiting public — 2026

Advanced Science News — *Artificial muscle could help facial paralysis sufferers blink again*, coverage of the *DEyeA* study — 2025

Werner Siemens-Stiftung — feature article on the facial reanimation implant, *An artificial muscle for a real smile* — 2024

EPFL News — *EPFL Bioengineering Team Wins Global iGEM Competition* — 2019

EPFL Open Days; regular presentation of research to visiting students and industry partners — 2021–2025

ADDITIONAL PROFESSIONAL EXPERIENCE

Investment Fellow, Verve Ventures, Switzerland
Evaluated medical technology ventures at a European early-stage investment platform. 2023

Co-lead, C-MedTec start-up project (not incorporated), EPFL Innovation Park
Two-person start-up project on concussion diagnosis using near-infrared spectroscopy, with business coaching from Dr. Marco Ruedi. Developed finite element models of mechanical impact and the associated biological cascade; validated results using an anatomically precise head phantom. Selected by the VP for Innovation and VP for Education to conduct my master's thesis within the project. 2019–2020

Research and Development Engineer, iGEM, Switzerland and USA
Developed *ViTest*, a field-deployable diagnostic for the grapevine diseases flavescence dorée and bois noir, delivering results in under two hours with no laboratory equipment or specialist training. Responsible for device design and microneedle fabrication for plant DNA extraction; contributed to the team wiki, market research, and human practices. 2018–2019

TECHNICAL SKILLS AND LANGUAGES

Experimental: soft actuator fabrication (DEAs, elastomer processing, electrode deposition by pad/inkjet/stencil printing), fiber-reinforced composite fabrication, mechanical and electromechanical characterization, in vivo animal trial design and execution, microfabrication, conventional machining.

Computational: finite element modeling, nonlinear constitutive modeling of soft materials, real-time control implementation, machine learning for actuator modeling, C/C++, Python, MATLAB, CAD.

Citizenship: Greek (EU); Swiss settlement permit (C).

Languages: Greek and French (native/bilingual); English (C2 Proficiency); German (basic); Spanish and Russian (A2); Mandarin Chinese (HSK2).

INTERESTS

Endurance sports and outdoor pursuits, including marathon and trail running (qualified for the 2027 Boston Marathon; several trail races), skiing: alpine/backcountry (training for the 2028 Patrouille des Glaciers), climbing, sailing (MIT Ladies' Team), windsurfing, and fishing (2nd place, international competition, Montreux 2024)
